BASIC SETUP SCORPIUS/CANIS GO 410 WIDE FLOOD

We believe in simplicity. The NORDIC LIGHTS® GO series is aimed at customers who are completely new to our products or would like to enhance their lighting standard from halogen to LED. The GO work lights are suitable for a wide range of applications. In this series, we designed a variety of standard NORDIC LIGHTS® GO models with a long lifespan and low maintenance. Easy to use, the GO work lights have a light output between 1000 and 3000 lumens and a dampening strength capacity of 8 Grms. They are a perfect fit for a variety of vehicles, including tractors.

PROFESSIONAL SETUP SCORPIUS/CANIS PRO 415 PHENOM OPTICS

NORDIC LIGHTS® Phenom Optics-equipped lights are extremely useful work lights delivering a glare-free work environment. With these work lights mounted on your heavy-duty vehicle, you will have accent lighting with soft illumination directed upwards as a guide light for lifting or other operations and efficient task lighting to illuminate the work area both directly in front of and further from the vehicle. Most importantly, people and other vehicles working nearby will not be blinded thanks to the glare-free zone it creates.
